SKILLS

- **Languages:** C, Python, JavaScript
- **Technologies:** HTML, CSS
- **Databases/Tools:** PostgreSQL, MongoDB, Git, GitHub
- **Soft Skills:** Problem solving, Team collaboration, Time management, Adaptability

PROJECTS

JARVIS- AI assistant

Aug 2026 – Aug 2026

- Developed an **AI-based virtual assistant named JARVIS** to provide interactive user assistance and perform various task-oriented operations.
- Implemented **Python-based logic** to process user commands, interpret inputs, and generate appropriate responses for requested tasks.
- Integrated **voice-based interaction** to enable users to communicate through spoken commands and receive automated responses while reducing manual interaction.
- Strengthened practical expertise in **Python programming, automation, command processing, and logical problem-solving** through project development and testing.
- **Tech Stack:** Python, Speech Recognition, Text-to-Speech (TTS), Natural Language Processing (NLP), APIs

Automatic Fire Security System

July 2026 – Aug 2026

- Developed an **automated safety system** focused on detecting fire-related situations and initiating an appropriate response quickly and efficiently.
- Designed **automatic response logic** to trigger necessary safety actions when fire or abnormal conditions are detected by the system.
- Applied **programming and sensor-based concepts** to enable real-time monitoring and support reliable system automation.
- Focused on reducing **dependence on manual intervention** by providing an automated mechanism for responding to potential fire emergencies.
- Strengthened practical knowledge of **automation, sensor integration, programming, and real-world problem-solving** through the development and testing of the project.
- **Tech Stack:** Arduino Uno, Embedded C/C++, LM3547IC

Weather Predicting System

Mar 2026 – May 2026

- Developed a **responsive web application** focused on providing weather information and prediction-based insights in an accessible format.
- Designed an **interactive and user-friendly interface** using HTML, CSS, and JavaScript to display weather conditions clearly.
- Integrated **weather-related API data** to retrieve and present useful information such as temperature, conditions, and other weather parameters.
- Applied **data handling and visualization concepts** to present weather patterns effectively while strengthening web development and API integration skills.
- **Tech Stack:** HTML, CSS, JavaScript, Weather API, REST API

CERTIFICATES

- Infosys Cybersecurity Certification.
- Solved programming questions through Neo Colab.
- Solved programming questions through CodeTantra.

ACHIEVEMENTS

- Qualified for the final round of a hackathon.
- Led a team to victory in a Python coding competition.

EDUCATION

Lovely Professional University

Bachelor of Technology – Computer Science and Engineering; CGPA: 8.07

Phagwara, Punjab
Aug 2025 – Present

ST. Karen's School

Higher Secondary Education; Percentage: 86%

Patna, Bihar
May 2022 – Mar 2024

ST. Karen's School

Secondary Education; Percentage: 88%

Patna, Bihar
Apr 2021 – Mar 2022
