

SUMIT RANJAN

Email: [your email] | Mobile: [your number] | LinkedIn: [profile] | GitHub: [profile]

SKILLS

Languages:	Python, C, JavaScript
Web Technologies:	HTML, CSS, JavaScript
Data & Libraries:	NumPy, Pandas
Database:	SQL
Core Strengths:	Analytical Thinking, Problem Solving, Teamwork, Time Management, Adaptability, Quick Learning

PROJECTS

Automatic Fire Security System

- Developed an automated safety system focused on fire detection and response.
- Designed automatic response logic for fire-related situations.
- Applied programming and sensor-based concepts to support system automation.
- Focused on reducing dependence on manual intervention during emergencies.
- Strengthened practical problem-solving through a real-world safety application.

NGO Website

- Developed a responsive website to present an NGO's work, activities, and mission.
- Used HTML and CSS to create a structured and user-friendly interface.
- Applied JavaScript concepts to add interactive website functionality.
- Organized content to make important information easy for visitors to find.
- Improved understanding of frontend development and responsive web design.

JARVIS — AI Assistant

- Developed an AI assistant project named JARVIS for interactive user assistance.
- Implemented Python-based logic for handling user commands and responses.
- Explored voice-based interaction and task-oriented assistant functionality.
- Designed the project around automating simple tasks through user input.
- Strengthened Python programming and logical problem-solving skills.

Weather Predicting Web

- Developed a web application focused on weather information and prediction.
- Created a responsive interface using HTML, CSS, and JavaScript.
- Integrated weather-related data to present useful information to users.
- Applied data-oriented thinking to understand and present weather patterns.
- Improved skills in web development, API-based data handling, and visualization.

CERTIFICATIONS & CODING

- Infosys Cybersecurity Certification.
- Solved programming questions through Neo Colab.
- Solved programming questions through CodeTantra.

ACHIEVEMENTS

- Qualified for the final round of a hackathon.
- Led a team to victory in a Python coding competition.

EDUCATION

- Lovely Professional University | B.Tech – Computer Science | CGPA: 8.07
- Class XII | Percentage: 86%
- Class X | Percentage: 88%

CAREER OBJECTIVE

Aspiring Data Science and Data Analysis professional, aiming to transform data into meaningful insights that support smarter decisions, improve efficiency, and create real-world impact.
